

The Finest British made balanced flued gas fires and stoves

The Shearsby Model 2887BL shown with coal effect

With over 50 years of experience in the fireplace industry, Burley brings you the finest quality hand made British balanced flue gas fires.

Burley's balanced flue fires draw air from outside to burn the gas, they then extract most of the heat and vent the exhaust back outside. In this manner you are not drawing cold air into your room or losing any heat up the chimney. Subsequently Burley's balanced flue fires are 83% efficient, costing just 16 pence per hour to run (based on 4p per unit).

With a choice of fuel beds, controls, trims, cast fronts and fascias, you have hundreds of combinations to find the one perfect for your living room.

Burley's factory in Oakham with 200kW of solar panels.

Energy

We have a never ending policy of assessment and implementation to reduce our impact on the environment. This includes generating our electricity with a 200kW array of pv panels on our own factory roof and 300kW on other buildings. Not only does this generate most of the total energy we use, it also provides electricity for up to 170 houses at weekends. Nearly all our heating in the factory is re-circulated heat from fires and stoves which are being tested. The offices are heated by biomass.

Manual control valve

Total control handset

Control options

Manual control

The manual control incorporates an integral ignition. Any flame height between high and low may be selected.

Total remote control

This option provides total control of your appliance by igniting the pilot and operating the fire by remote control.

Made in The United Kingdom

Burley are very proud to not only manufacture all our products in the UK, but to support British industry by buying as many of our components and materials as locally as possible.

We believe the public should be given total transparency so they can decide for themselves if they wish to support countries with poor environmental and human rights policies.

Origin of Purchases in 2019

United Kingdom	78.8%
Germany	11.0%
USA	2.6%
China	2.2%
Holland	1.8%
Italy	1.4%
Sweden	1.3%
India	1.0%

The Thurlby Model 2406 balanced flue stove

With cast door and legs, solid plate steel body and hand painted logs, the Thurlby combines the beauty, warmth and authenticity of a wood burning stove with the convenience and efficiency of balanced flue gas.

Choice of manual or fully remote control. An optional collar is available if you wish to fit an imitation flue pipe.

The Pickworth Model 2306 balanced flue stove

More contemporary and European in style, the Pickworth offers an alternative stove for a more modern setting. Turned beach handle, concealed controls and plate steel construction to create clean lines.
